CHAPTER I

INTRODUCTION

INTRODUCTION

In recent years, the use of smartphones and the internet has increased rapidly across the world, especially among students. With the advancement of digital technology, smartphones have become an essential part of daily life. They are no longer used only for communication but also for education, entertainment, social interaction, and accessing information.

The internet, combined with smartphones, has transformed the way students learn and interact. Online learning platforms, educational apps, virtual classrooms, and digital resources have made education more accessible and convenient. Students use smartphones to attend online classes, complete assignments, conduct research, and communicate with teachers and peers.

However, along with the benefits, excessive use of smartphones and the internet may also lead to negative effects such as distraction from studies, reduced physical activity, sleep disturbances, and addiction. Social media platforms like Instagram, WhatsApp, and YouTube can consume a significant amount of students' time if not used properly.

This case study aims to examine the patterns of smartphone and internet usage among students, understand their impact on academic performance and social life, and analyze both the positive and negative effects. The study will help in understanding how students can use digital technology in a balanced and productive manner.

CHAPTER II

OBJECTIVES

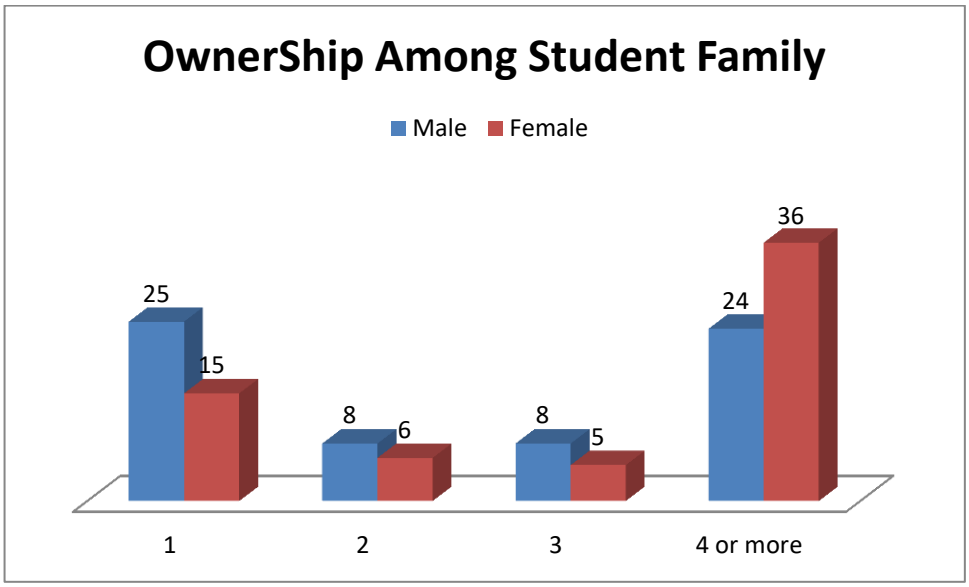
OBJECTIVES

- To study the level of smartphone ownership among student family.
- To analyze daily duration of smartphone and internet usage among students.
- To understand major purpose of smartphone usage (Study, Social Media, Gaming And Entertainment).
- To understand major purpose of smartphone usage for learning methods of education.
- To understand smartphone dependency through charging pattern.
- To understand student opinion.

CHAPTER III

REPORTING

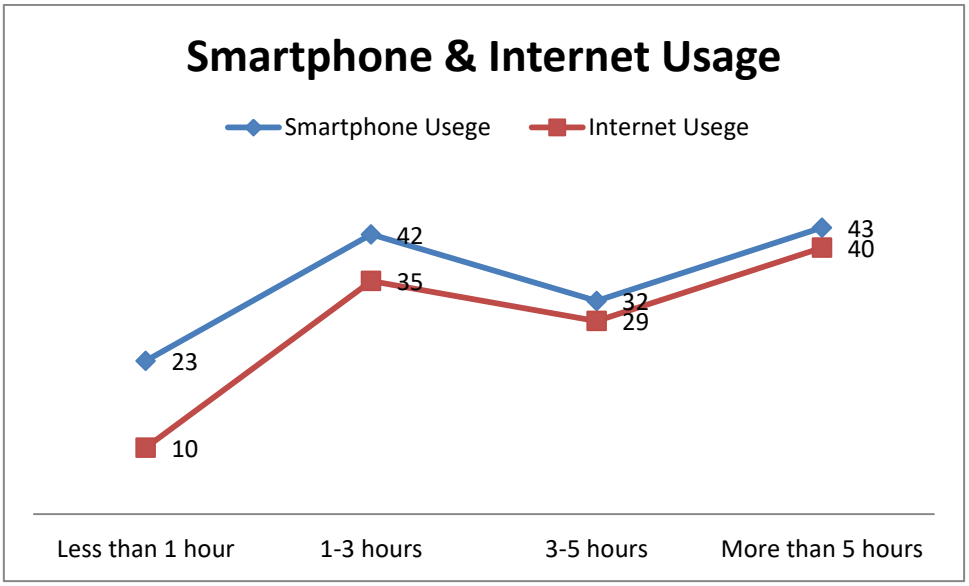
❖ The level of smartphone ownership among students family.



Gender/Number of Smartphone	Male	Female
1	25	15
2	8	6
3	8	5
4 or more	24	36

- The **highest ownership** category is **4 or more smartphones (60 people)**.
- In this category, **females (36)** own more smartphones than **males (24)**.
- For **1 smartphone**, **males (25)** have higher ownership than **females (15)**.
- Overall, **multi-smartphone ownership (4 or more)** is the most common among respondents, especially among **females.**

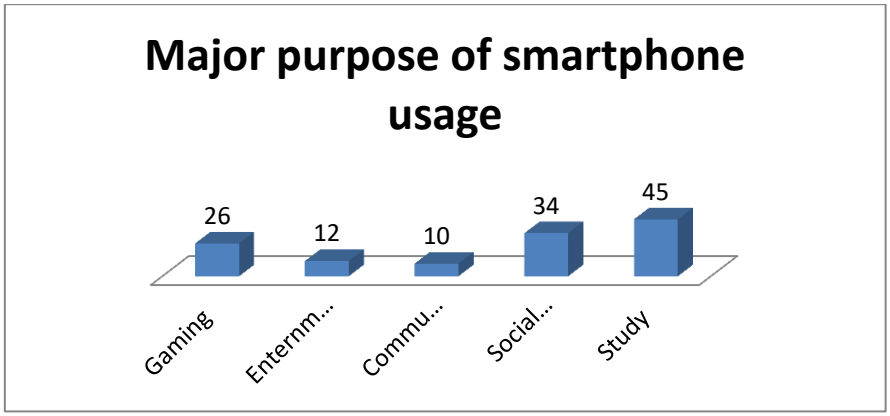
❖ Daily duration of smartphone and internet usage among students.



Time	Smartphone Usage	Internet Usage
Less than 1 hours	23	10
1-3 hours	42	35
3-5 hours	32	29
More than 5 hours	43	40

- Moderate users (1–3 hours) manage both phone and internet time well.
- Heavy phone users (>3 hours) tend to be heavy internet users too, which may impact academic focus and offline activities.
- Suggestion: Students should be made aware of **healthy screen time habits** to maintain balance between digital and offline life.

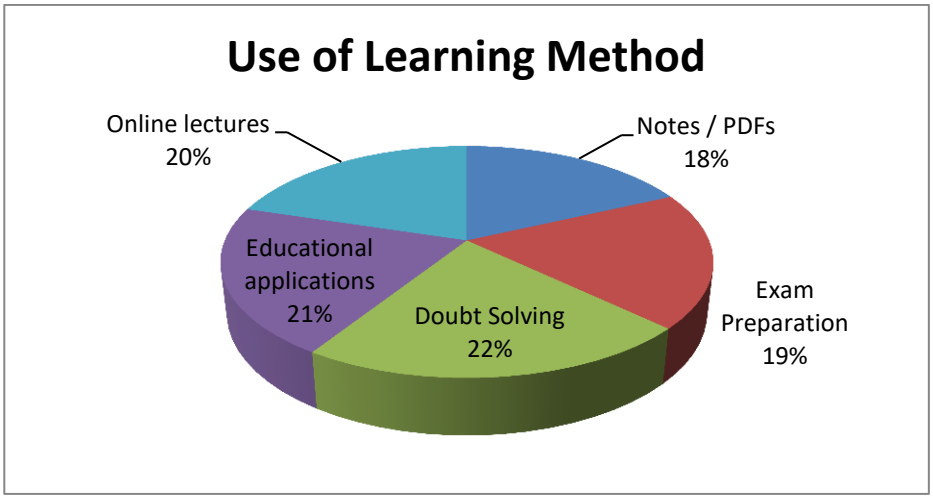
❖ To understand major purpose of smartphone usage (Study, Social Media, Gaming And Entertainment).



Gaming	26
Entertainment	12
Communication	10
Social Media	34
Study	45

- Smartphones are primarily used for **study and social interaction**, but overuse of social media may compromise students' concentration and academic performance.
- Leisure activities like games and entertainment are secondary.
- The limited use for direct communication highlights that students may be **losing face-to-face social skills**, which can affect personal and professional growth.
- Students should be encouraged to **balance smartphone usage** between educational, recreational, and social purposes to maintain focus and healthy communication habits.

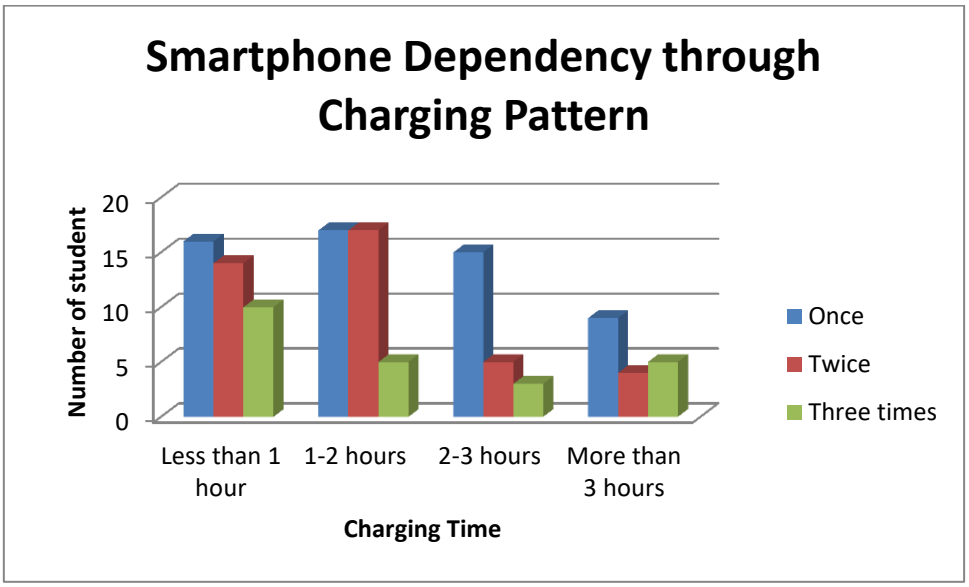
❖ To understand major purpose of smartphone usage for learning methods of education.



Learning Methods	Used Students
Doubt Solving	28
Exam preparation	24
Notes/PDF	23
Online Lectures	25
Educational Applications	27

- Students who **use smartphones specifically for study purposes** are actively engaging in all the above academic activities.
- **Doubt Solving (51 students)** is the most common activity, showing that students rely on their mobile devices to clarify doubts and reinforce understanding.
- However, **many students struggle to fully comprehend content in formal or academic language** provided in resources; this indicates a gap between accessing information and understanding it.
- **Educational Applications (48 students) and Online Lectures (47 students)** are also heavily used by study-focused students, reflecting the importance of digital tools in learning.
- **Notes / PDFs (42 students) and Exam Preparation (44 students)** remain essential activities, highlighting the mobile as a convenient study aid.

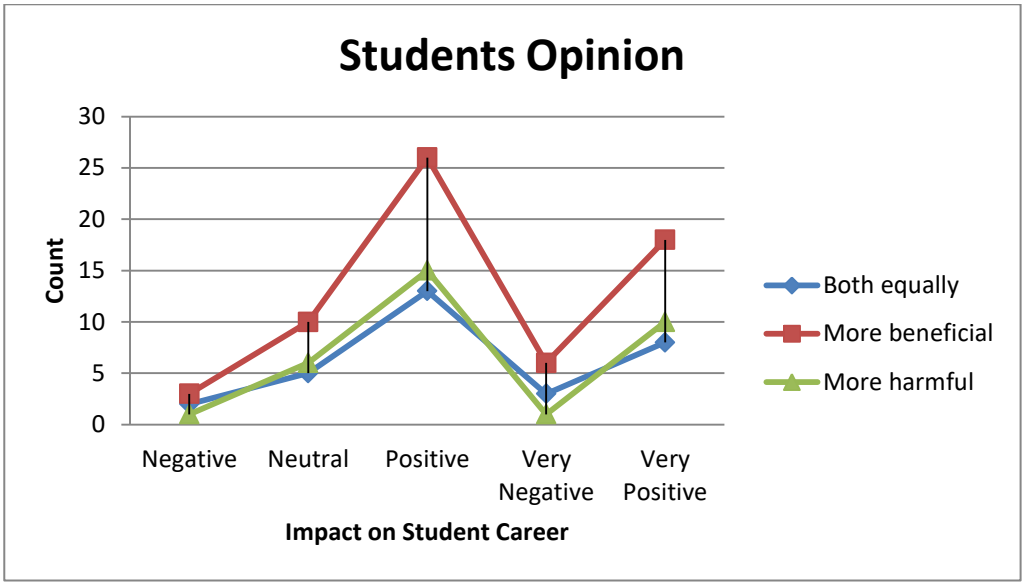
❖ To understand smartphone dependency through charging pattern.



Charging Time	Less than 1 hour	1-2 hours	2-3 hours	More than 3 hours
Once	16	17	15	9
Twice	14	17	5	4
Three times	10	5	3	5

- Most students charge their phones **once or twice a day**, predominantly for **short to medium durations (less than 1–2 hours per session)**.
- Students who charge **three times a day** are fewer, suggesting higher dependency or heavy usage, but they still prefer **short sessions** rather than long continuous charging.
- This data indicates a **moderate dependency on smartphones**, with a tendency to **avoid long charging sessions**, possibly to maintain battery health or because usage is intermittent.

❖ To understand Student opinion.



Need of use of smartphone / Impact of student Career	Negative	Neutral	Positive	Very Negative	Very Positive
Both Equal	2	5	13	3	8
More Beneficial	5	10	26	6	18
More harmful	1	6	15	1	10

- Most respondents with **Positive and Very Positive** attitudes view it as **more beneficial**.
- Even among **Neutral** respondents, more people selected **More beneficial (10)** than **More harmful (6)**.
- Negative perceptions exist but represent a **small minority** of the total sample.

CHAPTER IV

CONCLUSION

- **Family Income & Smartphones**: Higher-income families tend to own more smartphones, offering better access to **educational tools and internet resources** for students. Families with **above Rs. 50,000 income** own the most smartphones, while those earning **less than Rs. 10,000** own the fewest.

- **Social Media & Communication**: Excessive **social media use** can impact focus and academic performance. Students also show limited use of smartphones for **direct communication**, potentially losing face-to-face social skills.

- **Academic Activities**: Students use smartphones primarily for **doubt solving**, **educational apps**, and **online lectures**, with **Notes/PDFs** and **exam preparation** being essential. However, many students struggle to fully understand content in formal academic language.

- **Smartphone Usage**: Most students charge their phones **once or twice a day**, mainly for **short durations (1–2 hours)**. Heavy users (more than 3 hours) are fewer but still prefer **short charging sessions**, indicating moderate dependency.

CHAPTER V

QUESTIONNAIRE

1) What is your gender?

◯Male

◯Female

2) What is your course / stream of study?

◯Bachelor of Arts

◯Bachelor of Science

◯Bachelor of Commerce

◯Master of Arts

◯Master of Science

◯Master of Commerce

3) Which year of study are you currently in?

◯First Year

◯Second Year

◯Third Year

4) What is your family's monthly income?

◯Less than ₹10,000

◯₹10,000 – ₹25,000

◯₹25,000 – ₹50,000

◯Above ₹50,000

5) How many smartphones are there in your family?

◯1

◯2

◯3

◯4 or more

6) Do you own a smartphone?

◯Yes

◯No

7) How much time do you spend using a smartphone daily?

◯Less than 1 hour

◯1–3 hours

◯3–5 hours

◯More than 5 hours

8) How much time do you spend using a internet daily?

◯Less than 1 hour

◯1–3 hours

◯3–5 hours

◯More than 5 hours

9) Which device do you mainly use to access the internet?

☐ Smartphone

☐ Laptop

☐ Tablet

☐ Multiple devices

10) For which purposes do you use your smartphone?

☐ Calling

☐ Messaging (WhatsApp, Telegram, etc.)

☐ Social Media (Instagram, Snapchat, etc.)

☐ Online Study / Classes

☐ Reading (PDFs, notes, e-books)

☐ Gaming

☐ Entertainment (YouTube, movies, music)

☐ Photography / Video recording

☐ Online Shopping

☐ Other

11) For which purpose do you use your smartphone the most?

☐ Study

☐ Social Media

☐ Gaming

☐ Entertainment

☐ Communication

12) For which of the following academic activities do you use it?

☐ Online lectures

☐ Notes / PDFs

☐ Educational applications

☐ Doubt solving (Google / YouTube)

☐Exam preparation

13) How many times do you charging your mobile phone in a day?

◯Once

◯Twice

◯Three times

◯More than three times

14) What is the average duration of each mobile charging session?

◯Less than 1 hour

◯1–2 hours

◯2–3 hours

◯More than 3 hours

15) Does smartphone usage help you in your studies?

◯Yes

◯No

◯Sometimes

16) Does smartphone usage distract you from your studies?

◯Yes

◯No

◯Sometimes

17) What is the overall impact of smartphone usage on your life?

◯Very Positive

◯Positive

◯Neutral

◯Negative

◯Very Negative

18) According to you, is smartphone usage beneficial or harmful for students?

◯More beneficial

◯More harmful

◯Both equally

19) According to you, what should be the level of smartphone usage for students?

◯Limited

◯Moderate

◯Unlimited
